

Tempsonics®

Magnetostrictive Linear Position Sensors

GB Analog Data Sheet

- High pressure resistant sensor rod
- High operating temperature up to +100 °C (+212 °F)
- Flat & compact – ideal for the valve market

MEASURING TECHNOLOGY

For position measurement, the absolute, linear Temposonics® position sensors make use of the properties offered by the specially designed magnetostrictive waveguide. Inside the sensor a torsional strain pulse is induced in the waveguide by momentary interaction of two magnetic fields. The interaction between these two magnetic fields produces a strain pulse, which is detected by the converter at the sensor electronics housing. One field is produced by a moving position magnet, which travels along the sensor rod with the waveguide inside. The other field is generated by a current pulse applied to the waveguide. The position of the moving magnet is determined precisely by measuring the time-of-flight between the application of the current pulse and the arrival of the strain pulse at the sensor electronics housing. The result is a reliable position measurement with high accuracy and repeatability.

Fig. 1: Time-based magnetostrictive position sensing principle

GB SENSOR

Robust, non-contact and wear free, the Temposonics® linear position sensors provide best durability and accurate position measurement solutions in harsh industrial environments. The position measurement accuracy is tightly controlled by the quality of the waveguide which is manufactured by MTS Sensors. The position magnet is mounted on the moving machine part and travels non-contact over the sensor rod with the built-in waveguide.

Temposonics® GB is a rod-style sensor for installation into hydraulic cylinders, e.g. in power engineering. With its flat and compact sensor housing and side-mounted signal connection, the sensor is ideal for small spaces. Due to the pressure-resistant sensor rod and its high operating temperature the Temposonics® GB sensor is perfectly suitable for use in fluid technology. For improved signal quality the sensor automatically adapts to the strength of the magnet used in the application.

The set points, start and end position of the measurement, can be modified after installation of the Temposonics® GB sensor. Programming can be carried out using the standard connection cable. Optionally the sensor offers Bluetooth® ¹ connectivity for programming. In the case of Bluetooth® connectivity, set points can be modified even when the sensor is no longer accessible. The maximum range between sensor and receiver is 5 m (16 ft). With this option it is still possible to program the sensor via the cable connection.

TECHNICAL DATA

Output	
Voltage	0...10 VDC and 10...0 VDC (min. load controller: > 5 kΩ)
Current	4(0)...20 mA or 20...4(0) mA (min./max. load: 0/500 Ω)
Programming	Programming of set points using optional accessories ²
Bluetooth® version	2.1
Measured value	Position
Measurement parameters	
Resolution	16 bit (minimum 1 µm depending on stroke length)
Cycle time	Up to 1200 mm: 0.5 ms Up to 2400 mm: 1.0 ms > 2400 mm: 2.0 ms
Linearity	typ. ≤ ±0.02 % F.S. (minimum ±60 µm)
Repeatability	typ. ≤ ±0.005 % F.S. (minimum ±20 µm)
Operating conditions	
Operating temperature	−40...+90 °C (−40...+194 °F), option −40...+100 °C (−40...+212 °F)
Ingress protection	IP67 with proper mating connector IP68 for cable outlet
Shock test	100 g (single shock) / IEC standard 60068-2-27
Vibration test	15 g / 10...2000 Hz, IEC standard 60068-2-6 (resonance frequencies excluded)
EMC test	Electromagnetic emission according to EN 61000-6-4 Electromagnetic immunity according to EN 61000-6-2 The sensor meets the requirements of the EC directives and is marked with CE
Magnet movement velocity	Any
Design/Material	
Sensor electronics housing ³	Stainless steel 1.4305 (AISI 303), option: stainless steel 1.4404 (AISI 316L)
Sensor rod	Stainless steel 1.4306; 1.4307 (AISI 304L), option: stainless steel 1.4404 (AISI 316L)
Stroke length	25...3250 mm (1...128 in.)
Operating pressure	350 bar, 700 bar peak (at 10 × 1 min)
Mechanical mounting	
Mounting position	Any
Mounting instruction	Please consult the technical drawings and the operation manual (document number: 551511)
Electrical connection	
Connection type	Cable outlet 5 pin M12 connector A-coded 6 pin M16 connector
Operating voltage	+24 VDC (−15 / +20 %)
Ripple	≤ 0.28 Vpp
Current consumption	100 mA typically dependent on stroke length
Dielectric strength	500 VDC (DC ground to machine ground)
Polarity protection	Up to −30 VDC
Overvoltage protection	Up to 36 VDC

² Programming via Bluetooth wireless technology is disabled from operating temperature typically > +55 °C (+131 °F)

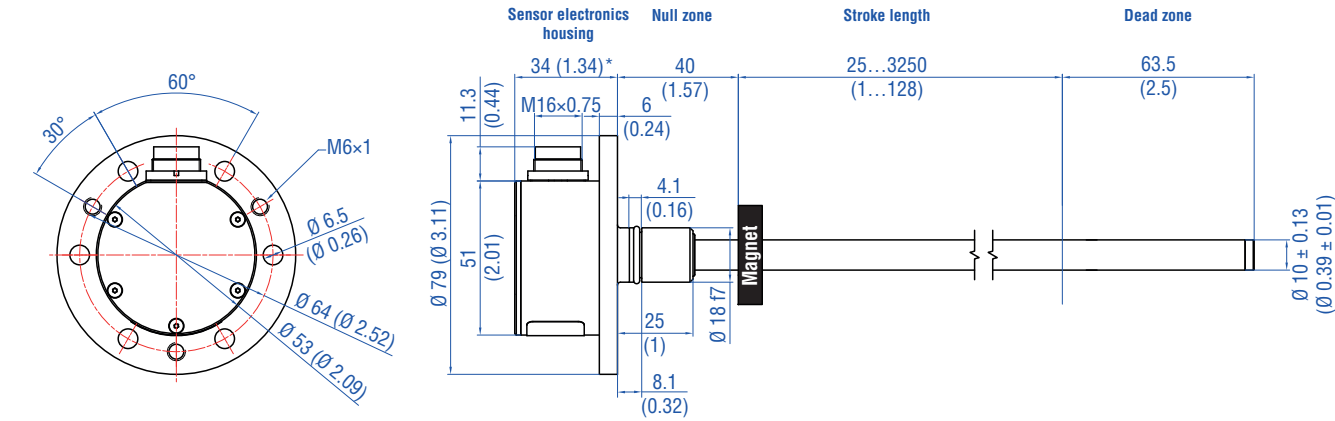

³ For option **H** (−40...+100 °C / −40...+212 °F) and option **W** (programming via Bluetooth wireless technology) an aluminum cover plate is used

DELIVERY

Sensor

Accessories have to be ordered separately.

Operation manuals & software are available at:
www.mtssensors.com

⁶/ The sensor in stainless steel 1.4404 (AISI 316L) is only available with following options:
[S] (–40...+90 °C / –40...+194 °F) and [C] (programming via cable)

* / Non standard stroke lengths are available; must be encoded in 5 mm / 0.1 in. increments

⁷/ Encode in meters if using metric stroke length.
Encode in feet if using US customary stroke length.
