Temposonics®

Absolute, Non-Contact Position Sensors

R-Series SSI

Temposonics® RP and RH Stroke length 25...7600 mm

- Rugged industrial sensor
- Linear and absolute measurement
- LEDs for sensor diagnostics
- Non-contact sensing with highest durability
- Superior accuracy: Resolution up to 0.5 µm
- \bullet Linearity better 0.01 % F.S.
- \bullet Repeatability 0.001 % F.S.
- Direct SSI output, Gray/binary
- Synchronous measurement for real-time sensing

Sensor diagnostic display

Integrated LEDs (green/red) provide basic visual feedback for normal sensor operation and troubleshooting.

Green	Red	Description			
ON	OFF	Normal function			
ON	ON	Magnet not detected			
		wrong quantity of magnets			
ON	Flashing	Sensor not synchronous*			
Flashing	ON	Programming mode			
*for synchronous measurement only					

Sensor input

SSI (Synchronous Serial Interface)

The sensors fulfill all requirements of the SSI standard for absolute encoders. Its position value is encoded in a binary format and transmitted at high speed to the control device

MTS offers the ideal solution for high dynamic applications by using different synchronisation modes. Corresponding to the application you can choose the following modes:

Async

In asynchronous mode the Temposonics® SSI sensor support the PLC with position values as fast as possible. The sensor works independently (free running mode).

Syn1

In synchronous mode 1 the output of the Temposonics® SSI sensor is matched to the data request cycle of the controller. The contouring error is as small as possible, the delay is equal to the cycle time of the sensor's stroke.

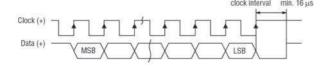

Syn2

The synchronous mode 2 is most suitable for applications where the polling cycle of the controller can be faster than the measurement cycle time of the Temposonics® SSI sensor. The values for the PLC will be oversampled up to 10 kHz. The delay is similar to the asynchronous mode.

Syn3

The function of the synchronous mode 3 is similar to Syn2 but here any delay will be compensated.

Timing diagram

Sensor field programming

Temposonics® R-Series sensors are preconfigured at the factory by model code designation. If needed, MTS offers an external service tool for modifying sensor parameters inside the active electrical stroke (minimum 25 mm between setpoints) via the standard connection cable. There is no need to open the sensors electronics.

USB-Programmer R-SSI

This hardware converter is required to communicate via USB-port of Windows PC to the sensor. Customized settings are possible by using a MTS programming software (CD-ROM) for:

- Data length
- Data format
- Resolution
- Measuring direction
- Synchronous / asynchronous measurement
- Offset, begin of the measurement range
- Alarm value (Magnet missing)
- Measurement filter
- Differential measurement: Distance between two magnets
- Speed measurement instead of position

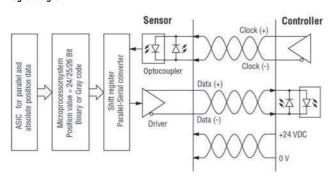

Test sensor function permits a fast control of installed sensor. Its position values are shown in a diagram.

Stable profile design

Temposonics® RP offers modular construction, flexible mounting configurations and easy installation. Position measurement is contactless via two versions of permanent magnets.

- A sliding magnet running in profile housing rails. Connection with the mobile machine part is via a ball jointed arm to taking up axial forces.
- A floating magnet, mounted directly on the moving machine part, travels over the profile at a low distance. Its air-gap allows the correction of small misalignments at installation.

All dimensions in mm

Standard position magnet included in delivery (see chapter accessories)

Position magnets

Magnet slider V (part no. 252 182) Magnet slider V (part no. 252 184) U-magnet OD33 (part no. 251 416-2)

Connection types

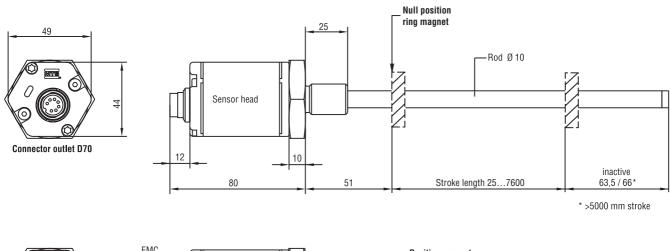

7 pin female connector M16 (part no. 370 624) 7 pin female connector M16, 90° (part no. 560 779)

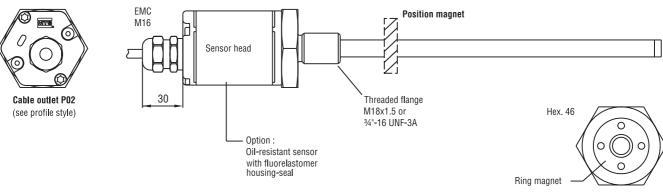

High pressure rod design

Temposonics® RH with a pressure-resistant stainless steel flange and sensing rod is suitable for use in hydraulic cylinders and externally in all applications where space is a problem. Position measurement is via ring or U-magnets travelling along the sensing rod without any mechanical contact.

Advantage...

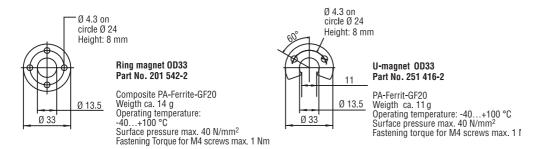

the completely operable sensor cartridge can be replaced for servicing easily without opening the fluid circuit.

= Magnets must be ordered separately (details see chapter accessories)

Standard position magnets (not included in delivery, please order seperatly)

All dimensions in mm

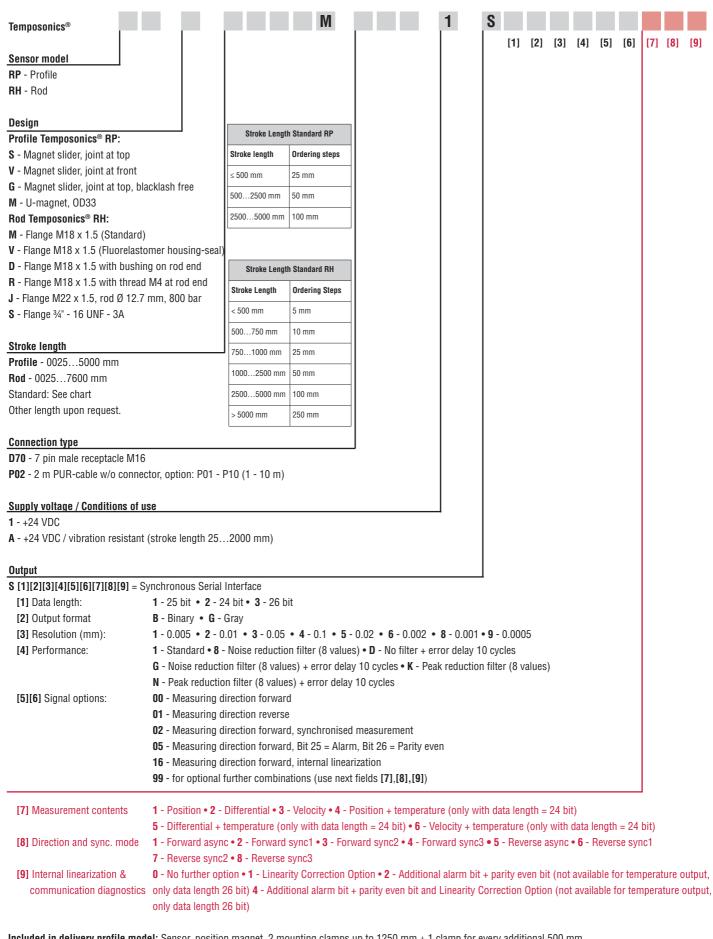

Standard position magnet <u>not</u> included in delivery (see chapter accessories)

Position magnets

Ring magnet OD33 (part no. 201 542-2) Ring magnet OD25,4 (part no. 400 533) U-magnet OD33 (part no. 251 416-2)

Connection types

7 pin female connector M16 (part no. 370 624) 7 pin female connector M16, 90° (part no. 560 779)

Included in delivery profile model: Sensor, position magnet, 2 mounting clamps up to 1250 mm + 1 clamp for every additional 500 mm. **Included in delivery rod model:** Sensor and O-ring. Magnets must be ordered separately. Use signed magnets for sensors w/LCO
